

# Biography: Moudy Ngwedzeni Mudzielwana

## Biography: Moudy Mudzielwana

I am a driven person who want to succeed whilst helping other people to grow and achieve me. I am positive and I see myself in greater heights with achievers. My personal brand is a religion, I am clear of what I want and what I cannot compromise. My vision is to work with people who appreciate success and willing to solve problems when everyone else want to analyse. I practice my technical skills and soft skills at all times. I train my brains through reading and studying.

I would like to be a leader in Advocating for Environmental Compliance and Human Development throughout the world by ensuring people understand the relationship they have with environment. There is no country that can succeed with unhealthy people. I believe in collaboration than competition. Without the people, the evolution and revolution in our land will not be sustainable, I advocate for human development
